

CONFIDENTIAL

LOGNOTE -- Chief, Operations Group, 19 December 1983

1. [] called to let us know the status of his contacts 25X1
with the embassy, Barbados on the need for further efforts to
expand monitoring of the Eastern Caribbean. [] said the DCM was 25X1
working on a cable expressing the need for continuing of Grenada
and Guyana. [] had told him of the estimated costs of a dedicated 25X1
phone line to Key West--at which the DCM was appalled--and had said
the choice would be between that and a call-up system, which would
require a new line from the phone exchange. FBIS would have to
check both possibilities out if and when the embassy expressed
sufficient interest. Thereafter, FBIS might send an engineer or
two to look into line options and the AC hum we had encountered. [] 25X1
- Meanwhile, the DCM had agreed to return the FBIS equipment to
Key West. [] 25X1
- [] said he had learned that another of his monitor/editor 25X1
candidates-- [] -has been security-disqualified. I told him 25X1
to put a couple more in processing, since the dropout rate seems to
be so high. Meanwhile, he will try to contact [] who 25X1
seems to have been mistakenly sent a letter of rejection, to tell
him we are still interested. [] 25X1
